

RE- FOR MAT

The Pool House
Haslemere

Introduction

The mature and secluded site is located in Haslemere on the edge of the Surrey Hills, enjoying stunning, long ranging views towards the South Downs and beyond.

The client's brief was for a detached ancillary building to the existing house to provide an indoor pool and spa, gym, bicycle workshop and glasshouse. Above all the building had to be beautiful, finely crafted at every detail using the highest quality materials. The Pool House needed to function effortlessly in a variety of environments, whether for a relaxing solitary swim or a family pool party for 30.

It was important for the building to integrate seamlessly within the sensitive site, to complement its surroundings and in particular build a positive relationship with the main house in terms of scale, form and appearance. The Pool House takes a low slung form to satisfy planning constraints, and is set on a simple alignment to the main house, creating a dialogue and generating a more complete arrival space.

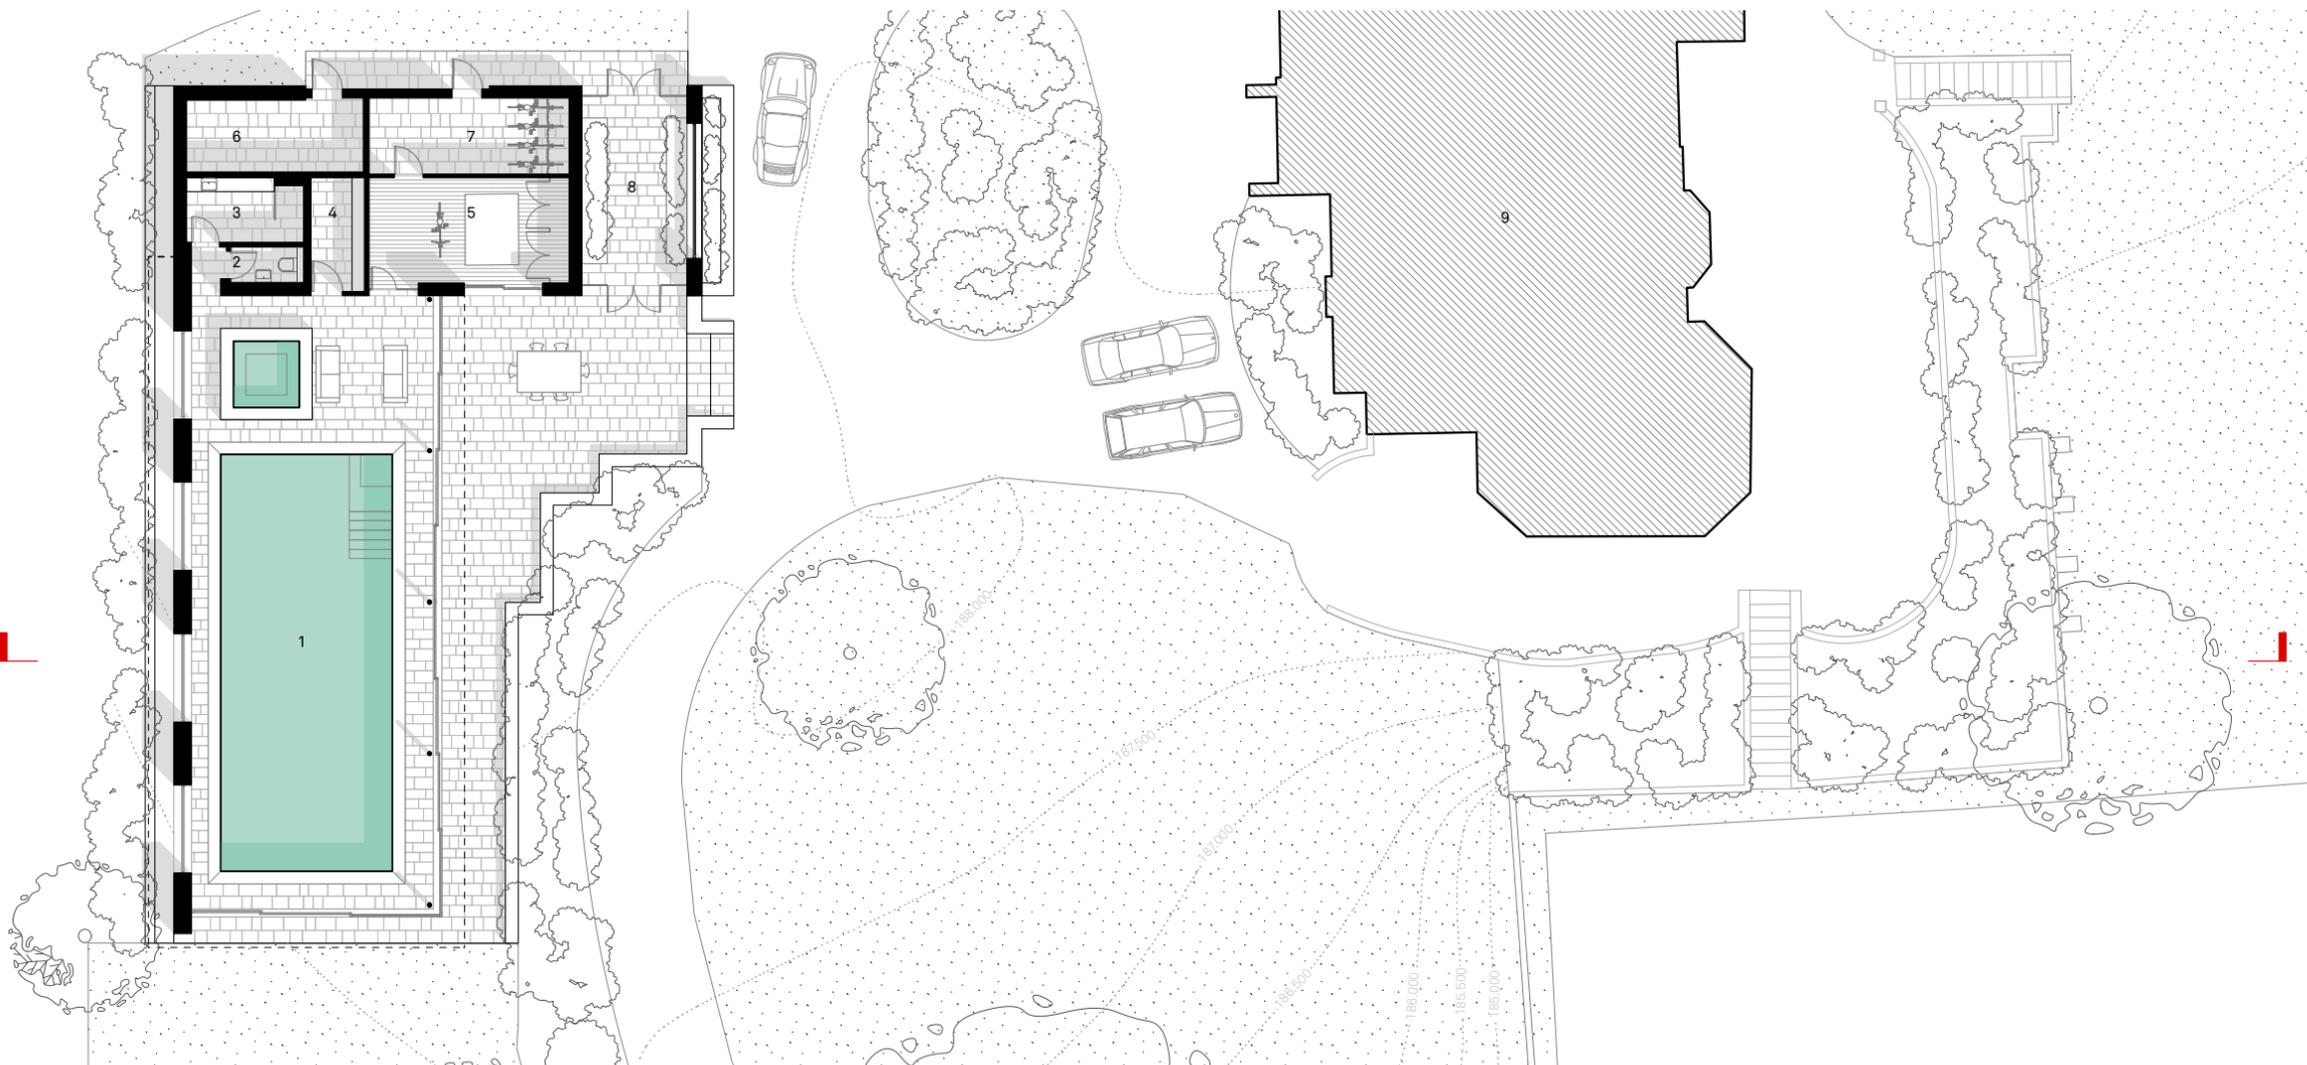

The design has been conceived as a simple copper pitched roof form with adjoining servant spaces in a low sedum roofed element, all contained by a continuous wrapping drystone wall. The contemporary design uses rich natural materials which create a warm and submissive palette (copper, limestone, oak) harmonising with the local vernacular. Generous sliding glass panels provide a connection to the gardens and glimpses of countryside beyond; expansive roof glazing floods the pool with daylight and views of the sky.

Re-Format's approach to the project was to adhere to a process of clarity – a balance of creativity and rational thinking. Creative design that required rigorous analysis and attention to detail that grew out of the constraints of the site and specifics of the brief.

Ground Floor Plan

Site Section

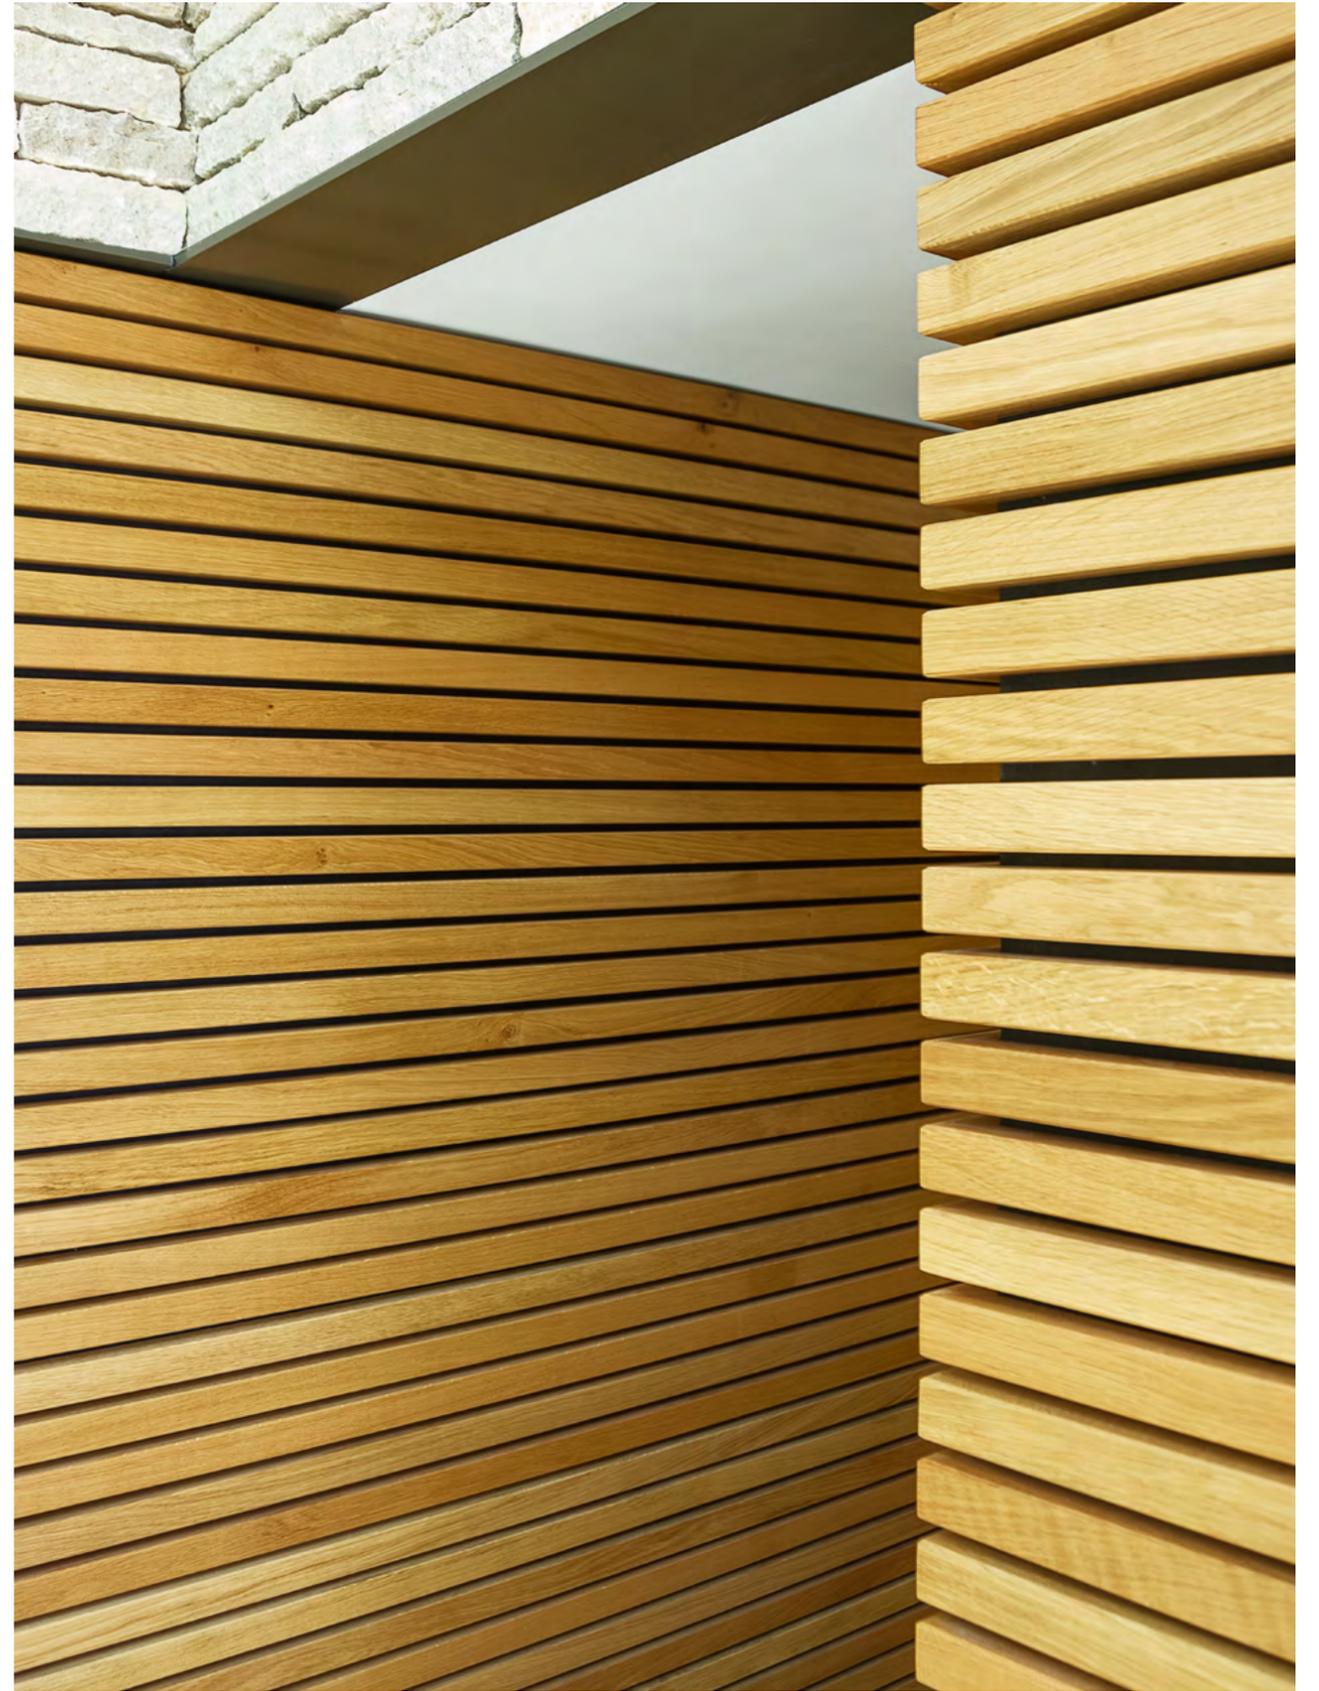

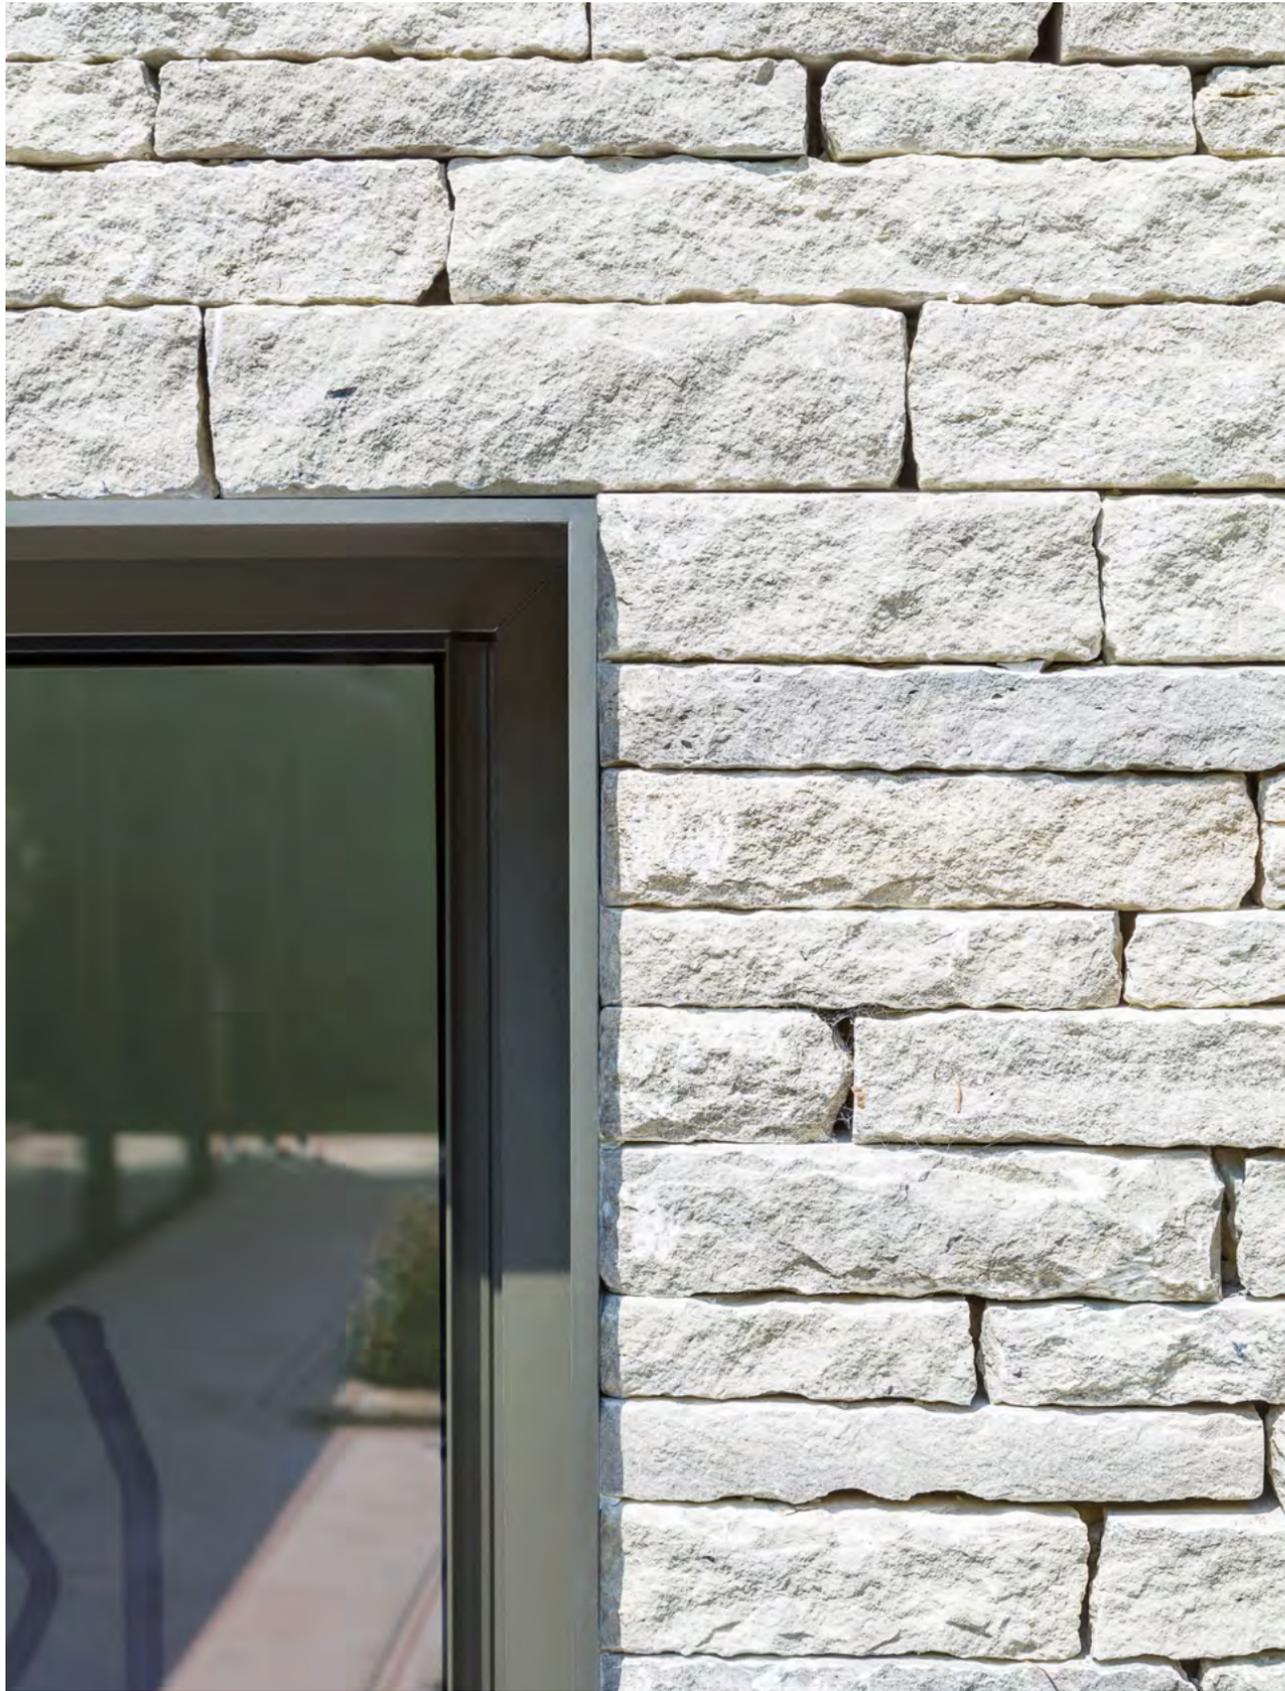

Key

- 1 Pool Area
- 2 WC
- 3 Wet Room
- 4 Store
- 5 Gym
- 6 Plant Room
- 7 Cycle Store
- 8 Glasshouse
- 9 Existing House

- 01 Copper standing seam roof
- 02 18mm WBP ply
- 03 Timber softwood batten / ventilation zone
- 04 Breather membrane
- 05 50mm rigid insulation
- 06 220mm rigid insulation between rafters
- 07 Vapour barrier
- 08 12.5mm Knauf Aquapanel
- 09 Concealed light fitting
- 10 130mm x 200mm steel angle
- 11 120mm x 200mm steel RHS
- 12 25mm rigid insulation
- 13 Steel plate
- 14 120mm steel CHS
- 15 4 Track sliding window system
- 16 Insect mesh
- 17 Single ply membrane to line secret gutter
- 18 Copper lined soffit
- 19 Recessed downlight
- 20 Copper drip detail
